HIGHLIGHTS

Message from the ALVS Staff

One of the pillars of the ALVS office is engagement. It's something that we strongly encourage our staff to do on a regular basis, and it's been one of the most important tools in the rebrand of this office over the last few years.

Aside from the staff in the office, we encourage our students to engage. Get involved; join a club, write for the paper, run for ASCSU, or offer your talents to an office that you're passionate about.

ALVS has a number of staff members graduating in May, meaning we have a number of jobs that we'll need to fill, they're listed below in more detail for your reference, and we'd encourage each of you to take a look at the descriptions and submit an application—we'd love to engage with

an application – we'd love to engage with you, and to see you engage with us.

Thank you,

Nate Day

RESOURCES

Jonathan Saam

I am an outstanding, hardworking, and intelligent individual who is balancing school and work to help myself get ahead after being medically retired from the United States Army. Before the military, I spent most of my younger years running around in the backwoods of Michigan hunting and fishing. After finishing high school I was not sure what I want to do in life so I went straight into the job market. Once I ended up figuring out what career would best suit me for the rest of my life I went to culinary school; it took me a total of four years to earn my first three associate degrees. Before finishing culinary school I enlisted in the United States Army as a 92G (food specialist). I spent only four years serving my country because I was forced into retirement because of injuries that accrued overseas. Shortly after leaving the military I went back to school getting my fourth-associate degree and getting accepted to Colorado State University. I have spent the past three years here at the university, which has been a great time. In the fall I will be applying to several different grad schools to see if I can further my knowledge and become qualified to teach at a higher education platform.
